

Appl. No. 10/551,072 Amdt. Dated August 9, 2007 Reply to Final Action of May 9, 2007

## **Listing of Claims:**

1. (currently amended) A medical apparatus comprising at least one surface which is at least partially coated with a hydrolytically condensed organosilane sol-gel composition,

wherein the <u>organosilane composition</u> provides iodine resistance comprises tetraethoxysilane, methyltromethoxysilane, and an organic, polymerizable substituent.

- 2. (previously amended) The medical apparatus according to claim 1, wherein the sol-gel material is formed from an organosilane compound and water.
- 3. (previously amended) The medical apparatus according to claim 1, wherein the sol-gel material is formed from an organosilane compound and silica particles.
- 4. (cancelled)
- 5. (previously amended) The medical apparatus according to claim 1, wherein the coating can be cured at a curing temperature of about 80°C or lower.
- 6. (previously amended) The medical apparatus according to claim 1, wherein the sol-gel is formed from an acid chosen from the group comprising malonic acid, dimethylmalonoc acid and itaconic acid.
- 7. (previously amended) The medical apparatus of claim 1, wherein said surface is a tabletop of a diagnostic system.
